

I strongly oppose the NAB petition 04-160. I have resorted to satellite radio because of the broadcast monopolies that limit and dictate my programming choices. I cannot reliably obtain weather and traffic information on any broadcast station in Detroit, with only limited coverage by one AM station. Further, classical music, which is my music of choice, has been completely pushed from the air in my region and replaced by yet more rock, pop and rap. The NAB is attempting to dictate my already limited listening choices, and its dictatorial initiative should be rejected.
